

March 17, 2022

International Trade (5205-221) Summer 2022

1. Curriculum

The module “**International Trade**” (5205-221) is relevant for students of the following bachelors’s programs:

- Wirtschaftswissenschaften (Profilbereiche: International Business and Economics, Wettbewerb, Marktversagen und Staat, Empirische Wirtschaftsforschung)

2. Course organization

The course is taught in English. We follow an **Inverted Classroom Model** with the following ingredients. We deliver the course content online via our learning platform (ILIAS). Learning units will be made available on a weekly basis. You are expected (i) to study the online course (e.g., videos, slides, notes), (ii) to solve the Problem Sets, and (iii) to post open questions in Forum for content-related questions and discussions on ILIAS. The agenda below lists what to do & when.

In additional – more or less – bi-weekly in-class **Meet-up Sessions**, the previous learnings unit will be wrapped up (e.g., by discussing important points of the Problem Sets and questions posed on ILIAS). Moreover, we will have **Mock Exam Session** where we explain important phrases used in the exam questions and answer your questions on the Mock Exam.

There will be a **Final Exam** (6 EP). The exam is an academic assessment that can be failed. By completing the e-Mastery tests **on a bi-weekly basis**, you can earn up to 10% of the final assessment (**Bonus Points**) in advance. The e-Mastery test will be online for a **whole week**, so you can arrange your time in taking the e-Mastery test.

You have to **register for the Final Exams via the Examination Office** (“Prüfungsamt”). There will be one exam on July 13, 2022 and a second exam at the end of the summer semester (the latter date will be announced later).

Regarding possible changes, please **check ILIAS frequently**.

For this semester, you do not need a password to join the ILIAS course:
